

TRI- Pro Damper Service for Use with CAD-Duct Solids

Instructions:

- From within the CAD-Duct Solids program, type “IMPORTSYS” at the command line in AutoCAD
- From the dialog box, click “Browse” and locate the supplied file TS-TRI-Pro.iez
- Click the checkbox labelled z-Transport Services (See image below)

- Click “Import” to begin the process of bringing the new items into the software
- Once imported the new TRI-Pro items can be located at the following locations
 - 1) The service drop down menu, located under the “Z-Transport Services” group (Note – Once imported the items can then be distributed onto other services within the software)

- 2) In the CAD-Duct “Item Folders” in the following location Item Folders > HVAC > Equipment > TRI-Pro (Note – Type “FOLDERS”)
